

Schlüter-ARCLINE-BAK are designer bathroom accessories made by KEUCO, which are pre-mounted on 6 mm coloured ESG safety glass. The glass panels have a rear bracket that easily clicks into Schlüter-ARCLINE profiles for adjustable positioning. The accessories from the KEUCO design series EDITION 400, EDITION 11 and PLAN are available in a variety of colour palettes and cover a broad range of styles. The bathroom accessories can only be installed in conjunction with ARCLINE profiles.

natural cream matte brilliant white dark anthracite

Comfort in style
EDITION 11

The design of EDITION 11 accessories stands out for visual lightness and elegance.. Their distinctive, yet understated design lends every-day bathroom items a sense of style. Accessories with chrome-plated surfaces draw attention with their flawless quality: slim and striking in design, extraordinary and surprising in function, brilliant and outstanding in surface shine. Perfect functionality down to the last detail: the shower basket with integrated glass wiper features a high-quality aluminium insert that stands out for its sturdiness and easy care.

Style and function combined
EDITION 400

The design of the EDITION 400 accessories combines organic shapes and slim contours to create a sense of pleasing aesthetic. The brilliant chrome-plated surfaces immediately draw attention and underscore the delicate elegance. The detail of the accessories make for additional highlights in a stylish wellness space. Thus, the aluminium shower shelf features a concealed "docking station" for the glass wiper. It is harmonically integrated into the shelf design.

Schlüter®-ARCLINE

Design and function in a unique combination

With Schlüter-ARCLINE, Schlüter-Systems offers an innovative product combination of receptacle profiles and matching accessories. Due to its special "No drill" design, ARCLINE does not penetrate the tiles or the underlying waterproofing assembly.

Together with the high-quality, award-winning accessories of the European market leader KEUCO, the innovative profiles enable a completely new approach to individual, adaptable design. The design of tiles, profiles and the matching glass support panels can be perfectly coordinated during the design process – combined to contrast or for blended aesthetics.

The accessories can be positioned in the profiles without drilling, therefore they can be adjusted or switched at any time, allowing every accessory to be exactly where it is needed.

Designed as a system

As you would expect from Schlüter-Systems, Schlüter-ARCLINE offers well-designed, systematic technology. The profiles are set in place during tile installation and form a decorative shadow gap that is ready for attaching accessories. The matching accessories from the EDITION 400, EDITION 11 and PLAN series by KEUCO are permanently mounted on glass support panels. They are simply clicked into the profile to enable a variety of arrangements.

Components

Two profile variants offer installation options: Schlüter-ARCLINE-APW is installed inline with grout joints in walls, while ARCLINE-APE is designed for external edges, for example in on-wall installations. The two profiles are available in heights of 8 and 11 mm and four different finishes – anodised aluminium, matte brilliant white, textured natural cream, and textured dark anthracite coated aluminium.

The 13 available, high-quality accessories from the EDITION 400, EDITION 11 and PLAN series by KEUCO are packaged pre-mounted on glass support panels. That means they are supplied ready to install and can be clicked into the receptacle profile when ready. The range of accessories includes hooks, rings and rails for towels, shelves, basket, toilet roll holders and toilet brush sets.

Design advantages

- The system's unique design, functionality and adaptability combine the high quality of two market and brand leaders.
- The accessories can be mounted without any drilling – causing no damage to tiles or the underlying waterproofing.
- The 39 accessories offer a wide range of design options.
- They are suitable for application around vanities, showers, baths and toilets.
- The accessories can be removed and rearranged at any time – for adapting the design and aid easy cleaning.
- Each accessory can be positioned exactly where it is needed.
- The satin look of the glass panels is a perfect complement to the support profiles.

Schlüter®-ARCLINE-APW

Schlüter-ARCLINE-APW is a decorative profile for joint design in tiled wall coverings and forms a narrow shadow gap. It is particularly well suited for attaching Schlüter-ARCLINE-BAK accessories for customised bathroom design.

Schlüter®-ARCLINE-APE

Schlüter-ARCLINE-APE is a decorative profile for joint design external corner edges or skirtings and forms a narrow shadow gap. Designed for attaching Schlüter-ARCLINE-BAK accessories for customised design.

Schlüter®-ARCLINE-DEL

Schlüter-ARCLINE-DEL is a protective decorative insert for the Schlüter-ARCLINE-APW and -APE profiles. The four colour options can create a deliberate contrast or be combined to match insert-with-profile, to complement tile and stone trends.
