Simply individual Schlüter®-LIPROTEC

LED light and ceramics – a combination that keeps gaining fans. Schlüter-LIPROTEC makes it easier than ever to create individual light concepts with ceramic or natural stone surfaces. With the Schlüter-LIPROTEC-EASY and Schlüter-LIPROTEC-PRO series, we offer systems that are tailored to the skills of the installers.

Whilst the EASY series is a plug-and-play system that only requires limited expertise in light installation, the PRO series is designed for professional installers who have experience with light installation and wiring. And finally, Schlüter-LIPROTEC-PLAN provides all information that professional (light) designers need to create and implement accent lighting with LIPROTEC.

Individual light installation made easy – thanks to convenient plug systems and easy mounting, the plug-and-play series provides solutions for every situation, even for installers who are not experts.

- Ready for immediate use
- Large selection
- Plug & play power supply units up to 100 W

Lighting for professional installers – with the PRO series of Schlüter-LIPROTEC, turn any room into an oasis of light.

In the PLAN section of our price list and website, planners, architects, light experts and installers can find all technical information at a glance.

Simply control light – Schlüter-LIPROTEC Bluetooth controls offer a wide range of options for conveniently operating individual light sources.

- Via remote control, mobile device or wireless rotary control
- With proven Bluetooth® technology

Simply setting accents

Schlüter®-LIPROTEC

Light ambience with many options

Bathtubs

The classic undercut of panelled bathtubs – newly realised with innovative LED technology. Schlüter-LIPROTEC gives your tub a floating appearance.

Showers

Our Schlüter-LIPROTEC LED technology is IP67-certified to enable lighting design in shower walls.

Skirting

Lighting coves in tiled skirtings or wide light accents with our QD profiles – discreetly softly lit guides to show you the way.

Linear lights

The illuminated profile technology of Schlüter-LIPROTEC adds elegant, individual structure to wall coverings and spaces.

Cove lighting

So-called cove lighting is the crowning finish of beautiful wall coverings. The light radiates from the edge of the covering to the ceiling to create a new, individual sense of space.

Niches

Wall niches are a particularly elegant way to create storage – and not just in bathrooms. Our illuminated niches also are true eye-catchers.

Mirror

Mirrors need light. Schlüter-LIPROTEC is the perfect way to combine your mirror image with soft LED lighting.

Staircases

Not just elegant, but also extra safe: Schlüter-LIPROTEC turns staircases into illuminated spaces and reduces the risk of tripping on steps.

Wall panels

Design with light and tiles. We provide all the tools you need to elegantly highlight wall panels and to give your space an individual appearance.

Intelligent light control

Whether conventional switch or innovative use via smartphone Bluetooth app or radio control – our intelligent control technology gives you complete command of your illuminated profile technology.

Via remote control (radio control)

or via app (Bluetooth control)
