

# Schlüter®-REFLEECE

Removable fleece

Substrate protection for tile and natural stone coverings

PROFILE OF INNOVATION

# Schlüter®-REFLEECE – Removable fleece

Exhibition halls, trade fair venues and retail stores are among the application areas with frequently changing floor coverings. Easy removal is an important concern. Schlüter-REFLEECE offers a practical solution. The self-adhesive fleece is a tile underlayment that separates the tile adhesive from the existing substrate. It enables the simple removal of coverings without leaving any residue or damaging the sub-floor. Schlüter-REFLEECE is made of recycled PET bottles or other recycled materials.

Schlüter-REFLEECE is a fleece mat made of recycled PET with a bonding layer laminated on the underside. It is suitable for creating easily removable floor coverings made of tiles and natural stone. The self-adhesive underside easily detaches from the substrate during removal without damaging the sub-floor. (Product data sheet 20.1)

## Schlüter®-REFLEECE

PET rolls

1 m x 30 m  
Art.-No.  
REFL 30M

## Schlüter®-DITRA-SOUND-KB

joint covering strip

38 mm x 50 mm  
Art.-No.  
DS KB 38

## Application areas

- ✓ Trade fair booths
- ✓ Exhibition halls
- ✓ Shops
- ✓ Pop-up stores
- ✓ Leased property such as offices, rental apartments etc.

## Product properties / advantages

- ✓ Self-adhesive
- ✓ Easy to cut
- ✓ Quick and easy installation
- ✓ Low assembly height from 0.8 mm
- ✓ Reduces impact sound by up to 9 dB according to EN ISO 140-8
- ✓ Quick and residue-free removal
- ✓ No damage to the existing substrate
- ✓ Schlüter-REFLEECE is made of recycled PET bottles or other recycled materials.
