

NHBC Technical Guidance 9.2/06

How we can help

At Schlüter-Systems, safeguarding your homes with dependable waterproofing is our priority. Rest assured, our products are engineered to meet the highest standards and adhere to the latest NHBC Technical Guidelines. Explore how Schlüter products align with these guidelines, ensuring your next project is NHBC compliant. Discover the comprehensive training and support we provide to elevate your construction endeavours and dive into a wealth of knowledge and resources to make your next project a resounding success.

NHBC Technical Guidance 9.2/06, what it means in practice

Here at Schlüter-Systems, ensuring the structural integrity of a building through effective waterproofing has always been of paramount importance. NHBC, in their latest Technical Guidance 9.2/06 'Substrates for tiling bath and shower enclosures, wet rooms, and bathroom pods,' further emphasises this.

Any residential construction in the UK beginning on or after 1st January 2025 and seeking an NHBC warranty must adhere to this Technical Guidance. The document prohibits the use of magnesium oxide boards and defines what substrates can be used in different scenarios.

It is required that all waterproofing solutions, irrespective of the substrate used, must hold appropriate certifications such as a European Technical Assessment (ETA).

Use our interactive NHBC guidance tool to help select the appropriate solution for your particular situation.

What products comply with the NHBC Technical Guidance 9.2/06?

Schlüter®-KERDI-TS

Complete sets, create secure waterproof connections for bathtubs and shower trays. They include a sealing band, adhesive, cleaning cloths, and corner pieces.

Schlüter®-KERDI-MV

A prefabricated waterproofing collar offers a reliable waterproofing solution for pipe penetrations. Available in different sizes so you can select the collar that suits your pipe diameter.

Schlüter®-KERDI-200

Put an end to damage caused by moisture: You can recognise optimal waterproofing under tiles by it's orange colour! Discover our popular KERDI products and all the advantages.

Schlüter®-KERDI-BOARD

Whether it be niche, seat or a washbasin, create the perfect substrate for your tiling quickly and easily with our tileable backerboards.

Schlüter®-DITRA

The original uncoupling membrane, DITRA keeps tiled surfaces permanently crack-free.

Schlüter®-DITRA-HEAT

Warm feet guaranteed. Precise time control and fast heat-up. Discover our system solutions for electric floor heating.

Training and support

“Our products cannot be sold, they must be understood.” Our ethos, outlined by company founder, Werner Schlüter, focuses on education. Our dedicated training center provides hands on learning for undertile heating, waterproofing, drainage, and substrate preparation.

We empower installers and contractors with expert training and ongoing support, ensuring project success.
